

ENVIRONMENTAL POLICY STATEMENT

Samaras Structural Engineers is committed to minimising the impact of its activities on the environment.

Samaras Structural Engineers will comply with all relevant Acts related to Environmental Protection in the Commonwealth of Australia.

The key points of this strategy are to:

- Minimise or reduce the amount of waste produced by evaluating operations on an ongoing basis to ensure they are as efficient as possible;
- Minimise or reduce pollution and consumption of fuel, energy and water;
- If applicable in the future, minimise or reduce toxic emissions through the selection and use of production and fleet requirements and the source of power;
- Use energy more efficiently where practicable;
- Actively promote recycling both internally and amongst its customers and suppliers;
- Source and promote a services & product range to minimise the environmental impact of fabrication, production, assembly, service and distribution;
- Meet or go beyond all the environmental legislation that relates to the Company;
- Use procedures to offset the greenhouse gas emissions generated by our activities;
- Samaras Structural Engineers will measure, where practicable, its various impacts on the environment and set targets for ongoing improvement;
- Provide environmental awareness training for employees and job specific training on environmental issues where required;
- Maintain an ISO 14001 certified management system.

This Environmental Management System will be regularly audited and revised as necessary to ensure its continued compliance with the ISO 14001 standard, corporate objectives and relevant legislative changes.
